

# Alternative Evaluation by GOAL

## TRAILS

### GOALS

### ALTERNATIVE A

### ALTERNATIVE B

#### Goal 1:

Contribute to an integrated regional multi-modal transportation network that promotes seamless intermodal connectivity, increases community access to the existing transit and trails network and improves reliability of personal travel.

#### Goal 2:

Manage and encourage the growth and economic development of the city, region, and state by providing transit and transportation improvements to areas designated for growth.

#### Goal 3:

Preserve and revitalize neighborhoods and business districts through context sensitive design of transit and trails, increased accessibility to mobility options and provision of affordable housing and transportation, and other community benefits.

#### Goal 4:

Provide a cost-effective and efficient transportation investment.

#### Goal 5:

Provide a transit, bicycle and pedestrian-friendly environment.

#### Goal 6:

Provide transit, bicycle and pedestrian connectivity among communities, and between communities and existing and planned recreational opportunities.

#### Goal 7:

Minimize adverse impacts to the environment, and foster positive environmental impacts.

#### Goal 8:

Ensure consideration of public input throughout project planning and development.
